

MECANIZACIÓN & MANTENIMIENTOS JOMAR

VALVES MACHINING SERVICES

Highly complex Machinery

WITH MORE THAN 25 YEARS OF EXPERIENCE IN THE MACHINING OF VALVES

M&M Jomar is a company specialized in the mechanization of valves with a professional trajectory of more than 25 years. Experience that has made us a benchmark, offering fast, high-quality solutions for the most demanding and competitive sectors such as petrochemical, nuclear and agricultural.

Our machining service is accompanied by a continuous verification process that minimizes the rate of incidents or returns, thanks to our highly qualified technical workforce.

We are specialists in the machining of valves of all kinds.

“We are specialists in highly complex parts of all types of sizes and materials such as inconel, titanium, carbon steels for industrial sectors such as petrochemical, nuclear, agricultural, paper, and automotive tools ”

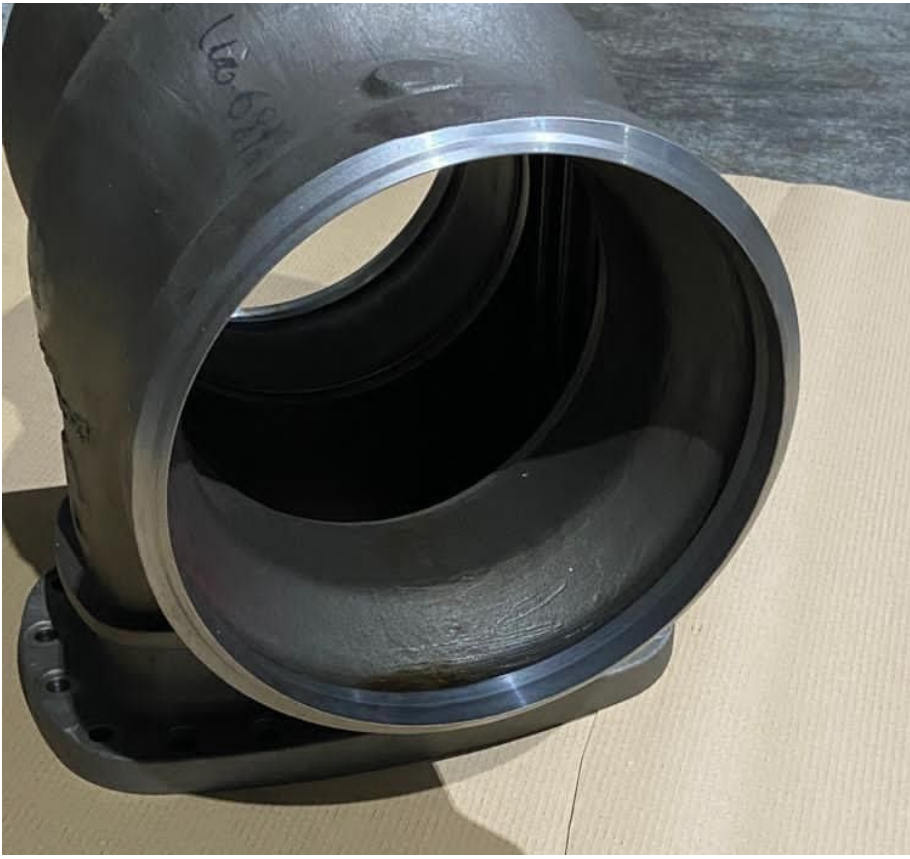

”

Armando Pomar-Founding Partner M&M JOMAR

PRODUCTION –CUSTOM SERVICE

We work to order through drawings and we are specialists in the machining of valves of all kinds.

M&M Jomar has become a specialist in the machining of valves of different types and applications for industrial sectors such as petrochemicals, paper mills, agricultural machinery, industrial and nuclear tooling and materials such as inconel, titanium and carbon steel.

MACHINERY

Regarding its machinery, M&M Jomar has lathes, milling machines and numerical control machining centers.

Its latest acquisition is a TREVISAN brand turning and milling machine, ideal for machining valves with 20 ", 24" and 2500 kg of load.

The grinding section has conventional and CNC machines with grinding capacities that reach 650 mm outer Ø and inner Ø.
